

KoldLok® grommets are the industry standard for sealing openings in raised floors and provide data center operators with the most reliable and durable brush grommets available on the market. Upsite Technologies® offers a full line of KoldLok brush grommets that not only efficiently limit bypass airflow — they also provide data center operators notable reductions in annual operational expense – approximately 50% savings than our closest competitors’ brush grommets.¹

Our grommets have been specifically designed to help eliminate bypass airflow in the data center, increase cabinet capacity, enable higher cabinet density, and dramatically lower energy consumption from excessive cooling.

PRODUCT LINE

1. SplitLok™ Integral Raised Floor Grommet

Part Number: 4040

6. Round Grommet

4" (102mm): 40001
6" (152mm): 40003

2. SplitLok™ Square Raised Floor Grommet

Part Number: 5050

7. Extended 3" Brush

24" (610mm): 10012
60" (1524mm): 10097

3. Integral Floor Grommet

One Piece: 1010
Split: 3030

8. Extended 6" Brush

24" (610mm): 10013
60" (1524mm): 10098

4. Surface Mount Grommet

Original: 2020
Large: 2030
XLarge: 2040

9. 2-Post Rack Grommet

Part Number: 10123

5. Mini Grommet

Part Number: 10077

¹ Based on incremental savings over those available through use of the test grommets exhibiting the highest levels of leakage on an area-corrected basis.
