

AisleLok® Magnetic Vertical Gap Panel

Part Number and Description

10229 84" Magnetic Vertical Gap Panel (5-pack)

The AisleLok® Magnetic Vertical Gap Panel (MVGP) is a quick and easy way to improve airflow management and may immediately improve IT equipment intake air temperature. The MVGP is the ideal solution to seal 2" to 9" wide gaps between racks or any ferrous metal surfaces. The panel attaches magnetically for an easy toolless installation application and relocation.

The MVGP complements and enhances the performance of all containment configurations by either blocking bypass airflow or exhaust air recirculation.

The AisleLok Magnetic Vertical Gap Panel comes in a convenient 5-pack. Each panel seals gaps from 2" - 9" (51mm - 229mm) wide x up to 84" (2134mm) high.

The new AisleLok Magnetic Vertical Gap Panel will improve airflow management and help you recover stranded cooling capacity. The MVGP represents a cost effective way of reducing IT equipment hot spots, cooling unit inefficiencies, and infrastructure cost. Sealing the gaps between racks with the Magnetic Vertical Gap Panel is an essential aspect of airflow management best practices.

Features

- Seals gaps ranging from 2" to 9" (51mm - 229mm)
- Suitable for cabinets heights up to 84" (2134mm)
- Can be overlapped for gaps taller than 84" (2134mm)
- Tool free magnetic application
- Flexible PVC material
- Economical solution
- Can easily be cut for gaps shorter than 84" (2134mm)

Benefits

- Easily install, remove, and relocate with magnetic application
- Toolless installation reduces installation time and labor costs
- Effective seal blocks bypass airflow and or exhaust recirculation and resulting hotspots
- Improves IT equipment reliability and extends equipment life
- Supports cooling unit fan speed reduction
- Supports higher supply air temperatures and free cooling utilization

Specifications

Part Number	Description	Shipping Dimensions	Quantity per Carton	Shipping Weight
10229	84" Magnetic Vertical Gap Panel (5-pack)	13" x 2" x 88" (330mm x 51mm x 2235mm)	5	35 lbs.

Product Dimensions

Materials

The Magnetic Vertical Gap Panel is made from .06" (1.5 mm) Flexible Black, PVC with a UL 94 V-0 Flammability Rating
