HotLok® MAC MINI EXPANSION KIT, 2-PACK

Part Number HLMM-200

Applications

The HotLok Mac Mini Expansion Kit provides a convenient solution for users to add additional Mac Minis to their HotLok Mac Mini Panel Kits.
The HLMM-200 Expansion Kit comes with (2) slide-out tray assemblies designed to accept M4 or M4 Pro Mac Minis (Mac Minis not included).
Once installed, the individual slide out trays can be removed without tools allowing easy access to the Mac Mini for power on/off button resets or swap outs.
The Mac Minis forward mounted position directly faces the cold aisle, providing operational indicator viewing and access to the USB-C receptacle and headphone jack.
The slide-out tray provides an intake port so the Mac Mini cooling fan can draw conditioned air directly from the cold aisle.
The HotLok Mac Mini Expansion Kit also features optional wireform cable retention.

Features

- (2) Individual slide-out trays designed to accept M4 or M4 Pro Mac Minis (Mac Minis not included).
- Toolless slide-out trays provide easy access to the Mac Mini for power on/off button resets or swap outs.
- Operational indicator viewing window with access to the front ports.
- Cold aisle conditioned air directly available to the fan intakes.
- Optional wireform cable retention.

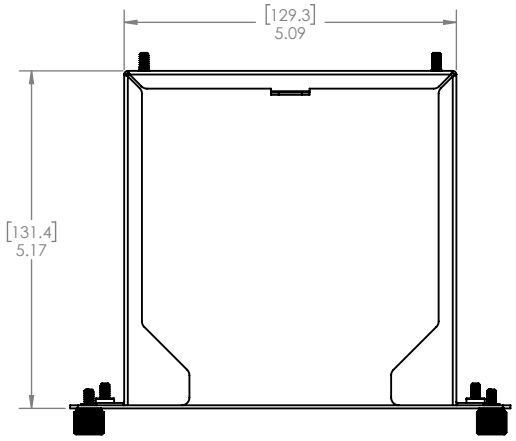

Benefits

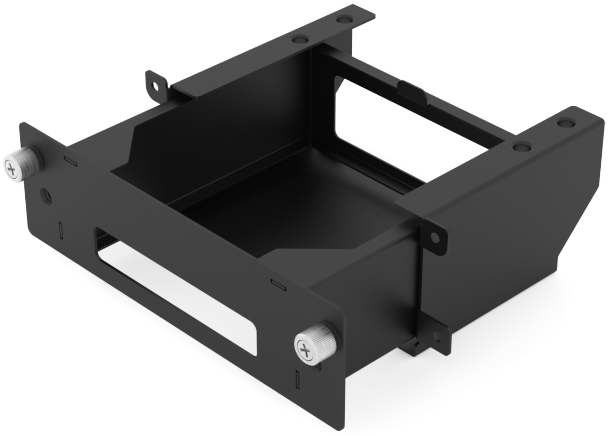

- Provides the ability to add (2) more rack mounted Mac Minis to the OCP and 19" Panel Kits.
- Offers easy access to rack mounted Mac Minis. No need to remove panel assembly.
- Visual confirmation that the Mac Mini is operational from the front of the rack.
- Cooling airflow pattern is compatible with a cold and hot aisle configuration, supports optimum cooling effectiveness and efficiency.
- Cable retention keeps wires organized and prevents accidental disconnect.
